DETAILED ACTION

Claim Objections

1. Claims 1, 8, 13, and 18 are objected to because of the following informalities: each claim, respectively recite “convertor”. The suggested spelling is -- converter --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Smart.

Regarding claim 14, Smart discloses audio level dynamic range compression. Smart's discloses in figure 1 and col. 4, lines 13-37 and col. 5, lines 18-63, which includes an audio signal input into an audio processor; a variable gain amplifier (VGA), an audio averaging circuit, and a microcontroller coupled to input from a compression means, the microcontroller receiving and outputting a digital signal, which indicates detecting when an input signal is above a threshold, reducing the gain of an amplifier, and restoring an output signal.

Allowable Subject Matter

4. Claims 1-13, 18-20 are allowed.

5. Claims 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 10/3/05 have been fully considered but they are not persuasive.

The applicant essentially argues overall that the prior of record fails to disclose the invention as claimed in respect to the limitation of “a compression recapture system”. Particularly in respect to claim 14, the applicant argues that “restoring an output signal of the input stage to include a compressed portion of the input signal” is not disclosed by the prior art of record. However, the claim language of claim 14 has been interpreted in respect to its broadest interpretation, wherein the claim fails to specifically define or provides specific limited meaning to the term “retoring” or how the restoring takes place. Thus, the Smart rejection for claim 14 is maintained.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
